

## **Notice on ESG**

In accordance with the European Union's understanding of sustainability, sustainability is not to be limited to ecological aspects alone, but should rather take into account the entire ESG spectrum (Environment, Social and Governance). In this respect, the VVGes is subject to disclosure obligations under the Sustainable Finance Disclosure Regulation (SFDR).

In compliance with these disclosure obligations, we announce the following:

Luxor Asset Management Trust reg. is aware of its responsibility to ensure a livable future for generations to come. It is currently not implementing the strategies foreseen under the EU regulations to incorporate sustainability risks in the investment decision-making process and consequently does not take into account the adverse impact on sustainability factors. This is partly due to the fact that not all relevant information on this is yet available. The remuneration policy of Luxor Asset Management Trust reg. does not set any negative incentives to disregard sustainability risks. We will closely monitor developments on this matter and will provide information about any changes here.
